

# LOKALFORENINGER

JANUAR 2020

the 1990s, the number of people in the world who are illiterate has increased from 400 million to 600 million.

There are many reasons for this. One is that the population of the world is growing so fast that the number of children who are illiterate is increasing. Another reason is that the number of people who are illiterate is increasing in many countries, especially in the developing world. This is because many of these countries do not have enough schools or teachers to teach all the children who are of school age.

There are also many people who are illiterate because they do not have enough money to go to school. In many countries, especially in the developing world, the cost of education is very high. This means that many children cannot afford to go to school, and they become illiterate.

There are also many people who are illiterate because they do not have enough time to go to school. In many countries, especially in the developing world, the workday is very long. This means that many children have to work instead of going to school, and they become illiterate.

There are also many people who are illiterate because they do not have enough interest in learning. In many countries, especially in the developing world, the culture is not very supportive of education. This means that many children do not want to go to school, and they become illiterate.

There are also many people who are illiterate because they do not have enough access to education. In many countries, especially in the developing world, there are not enough schools or teachers in some areas. This means that many children do not have access to education, and they become illiterate.

There are many ways to reduce the number of illiterate people in the world. One way is to build more schools and hire more teachers. Another way is to provide financial support to children who cannot afford to go to school.

Another way is to provide education to children who are working. This can be done by providing evening classes or by providing education through the workplace. Another way is to provide education to children who do not have enough interest in learning. This can be done by providing more interesting and relevant education.

Another way is to provide education to children who do not have enough access to education. This can be done by providing more schools and teachers in some areas. Another way is to provide education to children who do not have enough time to go to school. This can be done by providing shorter school days or by providing education through the workplace.

Another way is to provide education to children who do not have enough money to go to school. This can be done by providing financial support to children who cannot afford to go to school. Another way is to provide education to children who do not have enough interest in learning. This can be done by providing more interesting and relevant education.

# TEKNIQ Arbejdsgivernes lokalforeninger

TEKNIQ Arbejdsgiverne er geografisk organiseret i lokalforeninger, der tilbyder medlemmerne en række aktiviteter om branchens forhold. Aktiviteterne sikrer udover det konkrete udbytte at skabe og vedligeholde faglige og sociale netværk i branchen.

Lokalforeningerne er ret forskellige i både antal medlemmer, aktivitetsniveau, fagområder og kontingent. For specifik information om de knap 50 lokalforeninger se de efterfølgende sider og find den lokalforening, som passer til din virksomhed:

- » Vvs-lokalforeninger
- » El-lokalforeninger
- » TEKNIQ-lokalforeninger (el og vvs sammenlagt)
- » Arbejdsgiverne-lokalforeninger (industri, smede, el og vvs m.fl.)

Du kan også læse mere om de enkelte lokalforeninger, se bestyrelse og medlemmer på [www.tekniq.dk](http://www.tekniq.dk).

## Lokalforeninger efter eget valg

Ifølge TEKNIQ Arbejdsgivernes vedtægter er ethvert medlem forpligtet til at være medlem af en lokalforening. Der er frit valg for hvilken. Typisk vælges ud fra det fag og det område man arbejder i. Arbejder virksomheden inden for flere fag, kan man vælge den lokalforening, der bedst skaber værdi for ens virksomhed. Der er mulighed for at vælge medlemskab af flere lokalforeninger.

Valg af lokalforening noteres på indmeldelsesblanketten. Det er muligt, ved at rette henvendelse til Foreningsekretariatet, at skifte til en anden lokalforening ved udgangen af et kvartal.

## Personligt medlemskab af en lokalforening

Det er muligt i nogle lokalforeninger at tegne et personligt medlemskab. Det kan f.eks. være, hvis der er flere ejere i virksomheden, eller der er en afdelingsleder, for hvem det er relevant at deltage i lokalforeningens tilbud og aktiviteter.

Personlige medlemmer har samme rettigheder og pligter som virksomhedsmedlemmer.

## Har du spørgsmål?

Hvis du har spørgsmål om lokalforeningerne kan du kontakte Foreningssekretariatet i TEKNIQ Arbejdsgiverne på telefon 4343 6000 eller den pågældende lokalforeningsformand, hvis kontaktinformation står på lokalforeningens side på [www.tekniq.dk](http://www.tekniq.dk).
